

ConnectED Library Challenge

Hennepin County Library's Partners in Education Project increases library capacity to partner with school districts to support student learning both in and out of the classroom. **Hopkins Public Schools Power Up: Libraries** program connects students, families, and educators to public library databases, books, and electronic educational materials, as well as increases awareness of informal learning experiences and spaces available at Hennepin County Libraries during out of school time.

Hopkins Public Schools created a video to share how this partnership will support learning in the classroom.

Power Up: Libraries
